

Tajikistan & Kyrgyzstan: Through the High Pamirs 2027

23 MAY – 11 JUN 2027

Code: 22720

Tour Leaders Sophie Ibbotson, Russell Casey

Fitness Level 

Level 3 - Challenging

Among our most physically demanding

Journey to Tajikistan & Kyrgyzstan. This epic road trip through the Pamirs takes us through some of the most impressive mountain ranges on earth.

Overview

Rough and rugged Tajikistan is a place where few travellers venture. The Pamir Highway (M41) is the second highest road on earth (next to the Karakorum in Pakistan) and the majority of the highway is in Tajikistan. Our journey takes us through some of the most impressive mountain ranges on earth – the scenery on this drive is spectacular. This epic road trip through the Pamirs involves staying in some very basic guesthouses in multi-share rooms, as well as extensive travel on varied terrain at high altitude. It is not for the faint-hearted and is considered ASA's most challenging tour. **All participants will be required to consult with their GP to confirm they are fit to travel.**

- This tour is led by independent researcher, author of the [Bradt guide to Tajikistan](#), and Chairman of the Royal Society for Asian Affairs, [Sophie Ibbotson](#). Sophie will be assisted by [Russell Casey](#) who co-lead this tour in 2018.
- Journey through spectacular landscapes of glacial lakes, colourful meadows of flowers, turquoise alpine rivers, and stark mountain crags.
- Explore the UNESCO World Heritage Site of Penjikent, Central Asia's 'Pompeii', an ancient Sogdian Silk Road city destroyed by Arabs in the 8th century AD.
- Engage with the unique culture and beliefs of both the majority Tajiks and the smaller Pamiri community, who are Ismaili followers of the Aga Khan, descendants of the fabled medieval 'Assassins'.
- Gaze upon the largest ancient reclining Buddha west of China and wander through cosmopolitan towns where once thrived Buddhism, Christianity, Zoroastrianism, Hinduism, and Judaism.
- Engage with the glorious history of the ancient Silk Roads in the ancient bazaars of Khojand, Istaravshan and
- Visit the UNESCO World Heritage Site of Sarazm; one of the world's earliest towns linking India, Mesopotamia, Egypt, China, with Central Asia 5000 years ago.
- Explore seven millennia of artistic and cultural endeavour in Central Asia, including bright frescoes from Penjikent, ancient nomadic jewellery, eerie stone-carved nomad grave markers and the golden 'Princess of Sarazm' at Dushanbe's Museum of National Antiquities.
- Follow Marco Polo's route to Xanadu, along the River Oxus and through the lands of the Wakhi and Kyrgyz nomads.
- Travel through gorgeous valleys in the High Pamirs to ancient fortresses, abandoned 2000 years ago.
- Visit [Castle Karon, the 'Machu Picchu of Tajikistan'](#). This lost city, discovered in 2012, once provided accommodation for merchants travelling on the Silk Road to Khorog.
- Follow the Russian Imperial and Soviet history of Central Asia, including the action-packed chapters known as 'The Great Game', in which British and Russian spies and adventurers jostled for control on the Roof of the World.
- Discover the ancient city of Osh, one of the oldest settlements in Central Asia and the location of the only UNESCO World Heritage Site entirely within Kyrgyzstan, the holy mountain and place of pilgrimage known as Sulaiman Too (The Throne of Solomon).
- Follow Kyrgyz transhumants (seasonal nomads) with their great herds of horses and sheep across alpine summer pastures of the Suusamy Valley, full of herbs and wildflowers, and through the striking Chyckan Gorge and Ala-Archa Canyon.
- End your tour in Bishkek, Kyrgyzstan's lively capital city, with a farewell dinner serenaded by professional opera singers and musicians.

Group size: limited to 16 participants

Overnight Tashkent (1 night) • Khojand (1 night) • Penjikent (3 nights) • Dushanbe (3 nights) • Kalai-Khum (1

night) • Khorog (2 nights) • Zong (2 nights) • Murghab (1 night) • Osh (2 nights) • Lake Toktogul (1 night) • Bishkek (2 nights)

Testimonials

Felt very privileged to visit such a remote part of the world that very few get to see in a lifetime. Loved the magnificent, rugged unspoilt, spectacular and isolated mountains, lakes, rivers and roads – the Silk Road, the High Pamirs in particular. We loved seeing the layers of history: ancient Penjikent, Buddhist, Zoroastrian, Christian, Islamic and Soviet. A truly fascinating & memorable journey! Kim & Howard, NZ.

Visit a Persian-heritage people and the breathtaking Pamir mountains, home of a remote Ismaili culture. Also an insight into a central piece of the central Asia jigsaw between Russia, China and Afghanistan. Ronald, UK.

Extraordinary part of the world. Hard to believe you are in the same country as Marco Polo! Multiple layers of history – lots to learn! Colleen, NSW.

Overview

Cradled by the Pamir Mountains, source of the life-giving Oxus (Amu Darya) and Jaxartes (Syr Darya) rivers, Tajikistan is the garden of Central Asia. This is an untouched corner of the natural world that nevertheless was also a critical commercial crossroads for countless, diverse peoples for millennia. Between the sub-alpine vegetation of the Oxus valley and the stark granite peaks of the Wakhan Valley, Tajikistan is especially rich in flora and fauna. Snow leopards hunt Marco Polo sheep over mountain crags whilst eagles soar above glacial lakes. Spring unrolls endless carpets of wildflowers and autumn tips a cornucopia of fruit, nuts, and sweet berries from ancient trees shading traditional courtyard gardens. Stalin took the great emporia of Samarkand and Bukhara from the Tajiks, but they are still rightly proud of their long and glorious culture, seen in the important archaeological sites of Penjikent and Sarazm. Modern Tajikistan is often overshadowed by China, Pakistan, and Afghanistan, but not long ago this land bustled with traders from Europe and Asia all drawn by the treasures of the Silk Road; you'll encounter reminders of past wealth in colourful bazaars like that of Istaravshan, which like many towns we visit has a ruined Arg (fortress), a fine Central Asian mosque and madrasa, and a holy shrine, the Sar-i Mazor Complex.

Tajikistan's mountains are rich in precious stones and rare earth metals: the Lapis lazuli used to decorate Tutankhamun's funeral mask came from the neighbouring province of Badakhshan in Afghanistan. Silk sold in local bazaars became the gorgeous robes of Byzantine queens and European bishops. We follow ancient trade routes that crisscross Tajikistan and hear descendants of the great traders of the ancient Sogdian traders still speaking their ancient language in remote Yagnob Valley. Islam dominates modern Tajikistan, but a cosmopolitan history of Buddhism, Christianity, Zoroastrianism, Hinduism, and Judaism are all marked by ancient Kushan fortresses, reclining Buddhas, abandoned fire temples, and mountain shrines in the High Pamirs combining these different traditions into something unique to the mountain people. Nomad chieftains and merchant-princes, wandering Chinese monks, Russian spies and hearty Victorian women explorers shadow us, following in the footsteps of Marco Polo and Genghis Khan across Tajikistan and into Kyrgyzstan.

Combining Tajikistan and Kyrgyzstan in a single tour, we can compare and contrast two countries with shared histories but very different cultural identities. The Kyrgyz are a Turkic people, unlike their Tajik/Persian neighbours, and traditionally nomadic. Amongst Kyrgyzstan's much lush mountains and

lakes, we encounter transhumant herdsmen with their flocks and distinctive yurts. In the 3000-year-old city of Osh we will visit the UNESCO World Heritage Site of Sulaiman-Too, where 17 different places of worship exemplify the patchwork of faiths which have taken route here.

Leaders

Sophie Ibbotson

A researcher and consultant specialising in Central Asia, Sophie is Chairman of the Royal Society for Asian Affairs and an advisor to national governments and the World Bank. She was a 2023/24 Visiting Fellow at Oxford University's Changing Character of War Centre, and is the author of six guidebooks for Bradt Travel Guides, including 'Tajikistan', 'Uzbekistan', and 'Ladakh' and 'Kashmir'. She leads ASA's tour to Tajikistan through the High Pamirs.

Sophie is an independent researcher and consultant specialising in South and Central Asia. She graduated with an MA (Cantab) in Oriental Studies from Clare College, Cambridge, learning Hindi and Urdu and publishing her dissertation on the development of political ideology and portraiture at the Mughal court. She moved to Kyrgyzstan in 2008 to work for the Ministry of Economy; and subsequently received an MA and MSc in Finance and Investment from London School of Business and Finance, with a thesis on investor demand for Sharia-compliant finance regulations in Uzbekistan.

The majority of Sophie's work is economic development consultancy through her company Maximum Exposure and the World Bank. She was the international consultant for the World Bank's Rural Economy Development Project in Tajikistan from 2019-24, and has also worked on donor-funded projects across Central Asia and the Caucasus, the Western Balkans, and the Middle East. Sophie is an advisor to the Chairman of the Jokargy Kenes (Supreme Council) of the Republic of Karakalpakstan, and for the past six years has been Uzbekistan's Ambassador for Tourism to the UK. The Government of Uzbekistan has recognised these efforts, awarding her with the Turizm Fidoyisi medal of honour.

At Oxford University, Sophie was a 2023/24 Visiting Fellow at the Strategy, Statecraft, and Technology (Changing Character of War) Centre, where she studied the forecasting and mitigation of risks for water-related conflict in Central Asia and Afghanistan. She is a member of the Oxford Water Network, and also belongs to research groups exploring archaeological evidence for climate change in the Aral Sea region, and the resilience of hydroelectric power production in Kyrgyzstan.

Sophie is the first female Chairman of the Royal Society for Asian Affairs (RSAA), a British educational charity founded in 1901 as the Central Asia Society. She has oversight of the society's lecture and events programme and the ongoing digitisation and development of its extensive archives; hosts the quarterly Reading Room series; and is on the editorial board of the journal, *Asian Affairs*. The RSAA is an official partner in Sophie's ongoing Oxus Expedition, a source-to-sea study of the Oxus River, the findings of which will be published in 2026.

Sophie writes for a variety of academic and consumer publications, focusing predominantly on Eurasia. She is the author of six guidebooks for *Bradt Travel Guides*, and is a regular contributor to *Lonely Planet*, *Wanderlust* magazine, and *The Telegraph*. Sophie has also written for *The Economist*, *The*

Spectator, and National Geographic.

Russell Casey

Leading ASA tours to diverse locations since 2009, Russell is a passionate traveller with wide ranging knowledge and interests from science & technology to world history. He is particularly interested in the interactions between peoples, their beliefs, customs, arts and culture and the transmission of this knowledge.

Leading ASA tours (from Europe to the US and Central Asia) since 2009, Russell is a passionate traveller with wide ranging knowledge and interests from science & technology to world history. He is particularly interested in the interactions between peoples, their beliefs, customs, arts and culture and the transmission of this knowledge.

Russell worked in the health field as a medical physicist and in clinical informatics. He still maintains an interest in these areas consulting in radiation safety to the healthcare industry and clinical informatics consultancy to the IAEA.

A broad range of language studies & extensive travel to diverse regions has given him a greater appreciation of the similarities & differences in people's history, culture & religion which has proved invaluable in resolving unexpected encounters.

Russell has a broad interest in literature, the "Art of the Book", calligraphy, textiles & metal work. He has a particular interest in how old skills, arts & crafts are revived & applied in the modern context.

Constantly researching tours, Russell strives to enhance the experience of fellow travellers. He has undertaken accredited Oxford University short courses to further his knowledge including studies in Islamic Art & Architecture & Religion in Prehistory. With organisational management skills developed over many years Russell utilises this expertise to manage ASA tours. He regularly updates his first aid skills with the Queensland Ambulance Service.

Well regarded by ASA tour lecturers for his management style, an ASA colleague commented: "I could travel with him to the end of the world!"

Itinerary

The detailed itinerary provides an outline of the proposed daily program. The daily activities described in this itinerary may be rotated and/or modified in order to accommodate changes in museum opening hours, flight schedules etc.

Meals will be taken in hotels, in restaurants with a historical or local flavour, or picnic lunches will be provided. All meals are included in the tour price and are indicated in the itinerary where: B=breakfast, L=lunch and D=dinner. 2-3 500ml bottles of water (per person) will be provided each day for all site excursions. All meals include bottled water, tea or coffee.

Tashkent, Uzbekistan - 1 night

Day 1: Sunday 23 May, Arrive Tashkent

- Tour commences at 5pm in the foyer of the Lotte City Palace Hotel
- Welcome meeting & refreshments
- Independence Square
- Welcome Dinner at the Caravan Affresco Restaurant (7pm)

Meeting Point: The tour commences at 5pm in the foyer of the [Lotte City Palace Hotel](#) located directly opposite the Alisher Navoi Opera and Ballet House.

Tashkent is the capital of modern Uzbekistan. The Sogdian city of Chach was founded on the site during the 1st century BC, developing into a major entrepôt prior to the Arab conquest of 751. Sadly, little remains of historic Tashkent as the city was severely damaged by an earthquake in 1966 and rebuilt in grandiose Soviet style. It is currently the fourth largest city in the former Soviet Union with a population of anywhere up to 4 million people including undocumented migrants from the countryside.

After settling into our hotel there will be a welcome meeting and refreshments, followed by a short walk

through Independence Square. Tonight we enjoy a welcome dinner at a local restaurant. (Overnight Tashkent) D

Khojand, Tajikistan - 1 night

Day 2: Monday 24 May, Tashkent – Oybek Border – Khojand

- Oybek Border Crossing: Uzbekistan/Tajikistan
- Arbob Cultural Palace, Khojand
- City tour: Khojand Fortress & Historical Museum of Sughd, Sheikh Massal ad-Din Complex

This morning we set out overland for Tajikistan. Sixty kilometres north of Khojand we reach the Oybek border crossing between Uzbekistan and Tajikistan. After negotiating officialdom, we continue driving to Khojand (Khojent/Khujand, formerly Leninabad) – capital of Sugd Province in northern Tajikistan. The site of Khojand has been continuously occupied for 2500 years and the modern city stands on the remains of a city founded by Alexander the Great: 'Alexandria Eschate', or 'Alexandria the Furthest' defining the furthest point the Macedonian armies reached in north eastern Central Asia. A branch of the ancient Silk Road has run through the strategically important site of Khojand city for millennia and local bazaars were traditionally crowded with traders from China to Afghanistan.

After lunch we drive to the Arbob Cultural Palace located on the edge of the city. This peculiar monument was commissioned as the headquarters of a local collective farm in the 1950s. Extraordinarily, the local *apparatchiks* modelled Arbob on the Winter Palace in St Petersburg and today the building holds a museum dedicated to the history of the Soviet mission to 'civilise' Central Asia. Arbob was also the location where the Tajik Soviet officially declared independence from the Soviet Union in 1991 and where the design for the new Tajik flag was chosen.

Returning to Khojand, we explore the city, visiting the so-called 'fortress of Timur Malik' and the Provincial Historical Museum of Sughd. The 10th-century *Arg*, or citadel, once boasted seven gates and six kilometres of walls, standing on the site of Alexander the Great's original settlement. Numerous Bactrian/Sogdian and Hellenistic remains have been unearthed from this classic *Teppe/Tell*. The fortress gained its name from a local folk-hero, Timur Malik, who resisted the Mongol invasion of 1220 by retreating to an island in the Syr Darya (Jaxartes) River to the west of the city. Ultimately, Timur Malik's guerrillas ran out of supplies so he led his men and women in a final suicidal assault against the invaders. The location of the city on the banks of the mighty Syr Darya, at the southern edge of the fertile Fergana Valley, is clear evidence why this location has been continuously settled for so long.

We also visit the Sheikh Massal ad-Din complex, built to commemorate a local religious scholar who lived under the rule of the Ghurid Dynasty of Afghanistan, before being murdered for resisting the predations of the first Mongol governor of his ravaged city (1133-1223). The ensemble of buildings stands opposite the main bazaar and consists of a brick mausoleum built in 1394 by one of Timur Leng's sisters. It features covered porticoes with wooden pillars carved in local Khojandi-style, a 20th-century mosque, and a 21 metre-high brick minaret dating from 1865.

Tonight we dine in a local restaurant. (Overnight Khojand) BLD

Penjikent, Tajikistan - 3 nights

Day 3: Tuesday 25 May, Khojand – Istaravshan – Penjikent (280km, 6-7hrs)

- Istaravshan: Kuk Gumbaz Mosque & Abdullatif Sultan Madrasa, Sar-i Mazor Complex & Bazaar

- Shakhristan Tunnel (2760m)

We depart Khojand, Tajikistan's northern cultural and economic capital, driving via the town of Istaravshan to the ancient Sogdian city of Penjikent. Located in the northern foothills of the Fan Mountains, 78km southwest of Khojand, Istaravshan is another very ancient Silk Road town. Here, we visit the *shahrستان* (inner town) neighbourhood of Shahr-e Kohna which features traditional courtyard houses with gardens of fruit trees and flowers shade winding alleys and mud brick walls. This atmospheric district holds the lovely Kuk Gumbaz mosque and madrasa: Tajikistan's only extant example of Timurid architecture. Small and beautiful, with intricate tilework and a classic blue dome, this complex was commissioned by the regicide son of Uleg Beg, Abdul Latin (1420-1450), who probably began construction here after the murder of his father in 1449. Attached to the mosque is a madrasa whose Imams were actively teaching until a couple of years ago, when the government in Dushanbe, fearful of the rise of fundamentalist Islam, closed the classrooms.

We also visit the Sar-i Mazor ensemble of two 15th-16th century mausoleums and a lovely 16th-17th-century mosque, all set in elegant ornamental gardens. The first mausoleum is known by the unusual moniker of *Ajjina Khona*, or (Demon House); so-named by the Soviets in their efforts to discourage pilgrims and encourage the development of *Homo Sovieticus*. The exterior is suitably austere brickwork, while the interior retains some original features. The second mausoleum, by contrast, is richly decorated with fine exterior tile work and carved stone ornamentation. The interior is simple and holds the gravestones of Hazraji Mekhdoni Azam, his wife, eldest son, and a nephew. Azami was a local worthy, born during the 14th century in the Oxus delta, in far-away Khorezm. He owed his local significance as an educated governor and perhaps more importantly, the nephew of famed Sufi poet and theologian, Mir Sayyid Ali Hamadani. Hamadani was born in even more distant Hamadan, in western Iran, and was deeply influential in spreading Sufi ideals in 14th-century Kashmir. Hamadani's own mausoleum stands in Khatlon (home region of the faction surrounding and supporting the current president of Tajikistan) and both uncle and nephew are evidence of the once sophisticated and cosmopolitan history of the currently obscure, modern, mountain town. The 17th-century mosque is constructed in the Fergana 'Kokandi' style using carved wooden pillars and possesses a richly decorated interior.

In the town bazaar, metalworkers and woodworkers still practice their craft. Blacksmiths sell decorative traditional knives made from animal bone, horn and wood, famed throughout Tajikistan.

From Istaravashan we continue our journey through the Fan mountains towards the upper Zerafshan Valley and Penjikent. We drive through the beautiful Shakhristan Gorge where we enjoy lunch in a local *chaikhana*. We have dinner in a restaurant in modern Penjikent. (Overnight Penjikent) BLD

Day 4: Wednesday 26 May, Penjikent – Seven Lakes – Penjikent (80km + 80km)

- Seven Lakes (Haft-Kul) of Marguzor, Fan Mountains

Today we drive through the mountains to the 'Seven Lakes' or 'Haft-Kul' of Marguzor: a 20km-long chain of pools strung like blue pearls through the western foothills of the Fan Mountains. Each body of water possesses its own hue, varying from green-turquoise to deep purple. We see Mijgon, Soya, Hushyor, Nophin lakes at 2139m altitude, and the slightly higher Khurdak, Marguzor, Hazorchashma lakes at 2400m. We enjoy a light lunch at a national house before returning to Penjikent. (Overnight Penjikent) BLD

Day 5: Thursday 27 May, Penjikent

- Ancient Penjikent
- Bazaar and Olim Dodho Mosque

- Rudaki Historic Ethnographic Museum
- Proto-Urban Site of Sarazm

Penjikent was a major town established, probably in the 4th-5th century AD, by colonists from Afrosiab, downstream on the Zeravshan at modern Samarkand. The ancient town is located on a loess terrace, standing high above the Zeravshan River, 1.5km southeast of modern Penjikent and 1000m higher in altitude, blessing Sogdian Penjikent with an especially benign micro-climate. During the 5th to 8th centuries, this was a splendidly cosmopolitan town, enriched by international trade and filled with traders and visitors from across Eurasia. The area enclosed by the formidable city walls covers 20 hectares and probably held a population of 5000-7000 people living within a *shakhristan* protected by bastion towers on the three flanks, the fourth being protected by the river. At least the same number of people lived in *rabads* (suburbs) beyond the walls and garden villages clustering along the fertile valley. In the western end of the ruined town stands the great Teppe (mound) on which stood the *Arg*, or citadel-palace, of Penjikent. Amongst the ruined structures of the *shakhristan* stand the remains of at least two Sogdian Fire Temples, with pictorial evidence that Buddhism, Nestorian Christianity, Manichaeism, and Judaism were all openly practiced by the population. Sogdian Penjikent owed allegiance to the elected 'king' of the much larger city of Afrosiab, or the hereditary kings of the small Sogdian state of Osrushana, who dominated a swathe of mountain valleys between Afrosiab and the Oxus River.

The eruption of Arab Muslim invaders out of the Arabian Peninsula and their destruction of the great Sassanian Empire in just a couple of decades during the 7th century, entirely removed one of the most significant trading and military partners of the Iranian-speaking Sogdian confederation. Even as Umayyad Arab armies pressed north to the Oxus River, Sogdian city-states and small kingdoms would not unite, presenting a disunited face to the Muslim invaders. A 'king' of Samarkand attempted to overthrow the social order of Afrosiab and forge a military alliance with the mighty Tang Dynasty of China, but was overthrown in turn by his own people. The evidence of his last efforts to resist the Arab invaders is immortalised in the stunning frescoes excavated and now on display in the museum of Afrosiab in Samarkand.

In the face of Sogdian disunity, the Arabs captured the western and central cities of Transoxiana one by one: Merv, Paikend, Bukhara, Vabkent, and Afrosiab were all subdued by the wily Arab general Kutaiba Ibn Islam in alliance with the Bactrian Iranian ruler of Balkh, who was eager to humiliate and annex his traditional northern Sogdian rivals. Kutaiba revelled in his governorship of the new Umayyad province of Greater Khorasan until his unsuccessful rebellion against a new Caliph in 716 AD. A new governor appointed from Damascus, immediately offended the many Sogdian men who had converted to Islam – often from political expediency – by insisting they were liable for the *jizya*, or poll-tax, unless they were publicly willing to prove they had been circumcised. By 719 AD, the northern and eastern Sogdian city-states – including Penjikent – were in open rebellion against the Umayyads and in conjunction with Turkic-speaking nomads from the steppes were able to keep the Muslim armies from pressing into the Fergana Valley, or venturing upstream from Afrosiab.

The disgruntled Caliph in Damascus sent another new governor to Transoxiana in 720 AD, who successfully split the Sogdian resistance with a shameless policy of bribery and a relaxation of some of the more egregious restrictions imposed on converts to Islam by his predecessor. Not all Sogdians were convinced by this steel-fist-in-the-velvet-glove approach and in the same year, a young Sogdian warrior by the name of Divashtich seized power in Penjikent. Divashtich advocated a policy of open war against the Arabs to avert the ultimate destruction of Sogdian independence. The Sogdian successfully led a 2-year rebellion before being betrayed to the Umayyad governor by an 'ally'. Divashtich retreated high into the mountains east of Penjikent, just ahead of Arab armies who besieged and burned the town. This act of destruction had the unexpected side-effect of preserving much of Sogdian Penjikent as it was on the day of its destruction.

in 722 AD. The great 3 and 4-storey wood and mud brick houses, with gorgeous interiors decorated by frescoes and murals, collapsed in on themselves; the painted walls of the ground floor were protected by the rubble of the upper floors. The fire temples, Manichaean chapels, Buddhist shrines, Nestorian churches, Jewish synagogue, merchants' warehouses, all were looted and burned before the Arg was assaulted and its great walls levelled.

Devashtich and his army were besieged upstream in their mountain-fortress at Mt Mugh for two months, until in July 722 the Sogdian rebellion collapsed. Devashtich was crucified on the smouldering ruins of one of Penjikent's fire temples and his pickled head sent to the Caliph in Damascus as proof of the end of Sogdian independence in Transoxiana. Devashtich would undoubtedly have stayed an obscure footnote for specialists of Central Asian history had not a Tajik shepherd made an extraordinary find on the slopes of Mt Mugh in 1932. The shepherd discovered a cache of letters written by Devashtich and his senior commanders. These documents relate to the administration of both the rebellion and Sogdian civic life, including marriage contracts and business deals, diplomatic letters to and from the Tang Chinese, and reports about local resistance to the Arabs; all the documents date to 721/22 AD. The Sogdian letters, contracts and reports were written on leather or bone, but three letters on recycled Chinese paper in eight fragments suggest that true paper was indeed a luxury import into Central Asia and beyond before the capture of Chinese specialists at the Battle of Talas in 751 AD.

Late-morning we return to Penjikent to visit the city's lively bazaar which features a monumental decorative gateway, and the adjacent Olim Dodho Mosque whose multi-domed roof is reminiscent of the Grand Bazaar in Istanbul.

Following a *plov* lunch in a local *chaikhana*, we visit the Rudaki Museum, dedicated to Abu Abdullah Rudaki (858-941), the 'father of Persian poetry' of the Samanid dynasty at Bukhara and a near contemporary and great influence on the writings of Ferdowsi, author of the Iranian classic text the *Shahnameh*, or 'Book of Kings'. The museum holds artefacts excavated from the ruins of Penjikent by the Soviet archaeologist Marshak and a series of reproduction frescoes from some of the houses on the site. Sadly, as with the cache of letters from Mt Mugh, most of the original frescoes now lurk in the gloomy bowels of the Hermitage museum in Russia.

We end our day with a visit to the ancient settlement of Sarazm; translating roughly as 'where the land begins'. This site was discovered by a local farmer who pulled a beautiful copper dagger from the soil in 1977. Excavations began a year later, unearthing one of the earliest urban centres in Central Asia. Rich finds revealed close contact between the people of Sarazm, the peoples of the Indus Valley, and the peoples of the Bactrian Margiana Archaeological Complex culture living along the Oxus River.

This UNESCO World Heritage site was occupied from the early 4th millennium BC to the end of the 3rd millennium/beginning of the 2nd millennium BC. The proto-town is situated between high mountain meadows suitable for cattle rearing by nomadic pastoralists and a large well-watered valley conducive to irrigated agriculture. Finds from Sarazm demonstrate a vast geographic range of commercial and cultural exchange, with trade relations extending from the steppes of Central Asia to the Iranian plateau, the Indus valley, and as far as the Persian Gulf. The people of Sarazm probably exported local turquoise and lapis lazuli from Badakshan, developing into one of the most significant urban centres of its day. Barley and wheat excavated from the site and genetically analysed in 2010, revealed the barley to be one of the earliest strains domesticated in China during the 4th millennium while the wheat came from distant Anatolia. Perhaps the most extravagant find at the site is the so-called 'Princess of Sarazm'. This high-status woman was interred around 3000 BC, dressed in finely worked clothes decorated with lapis lazuli, turquoise, jasper, and limestone beads, and put to rest with an exquisitely worked bronze mirror. Most of these artefacts are now on display at the Archaeological museum in Dushanbe. This early entrepôt, busily

trading with far-flung peoples 1000 years before the construction of the Great Pyramid at Giza, was probably destroyed by Indo-European steppe raiders who settled the region during the 2nd millennium BC. (Overnight Penjikent) BLD

Dushanbe, Tajikistan - 3 nights

Day 6: Friday 28 May, Penjikent – Dushanbe (220km, 4-5hrs)

- Iskanderkul, Fan Mountains

Today we drive to Dushanbe. En route we pass the Iskanderkul: a beautiful glacial mountain lake at an altitude of 2195m on the northern slopes of the Fan Mountains. According to local legend, Iskanderkul was named after Alexander the Great – known as 'Iskander' in the East. Tajiks believe that Alexander the Great's route to India passed by this lake, but there is no evidence for the tale. We arrive in Dushanbe in the late afternoon and check into our hotel.

After dinner, there will be the option to visit the Istiklol Monument, a 121-m high tower built to celebrate Tajikistan's 30th anniversary of independence in 2021. On a clear evening, the monument's observation deck provides superb views over the city. (Overnight Dushanbe) BLD

Day 7: Saturday 29 May, Dushanbe – Hissor – Dushanbe

- Hissor Fortress
- Madrasa-i Kuhna
- Madrasa-i Nau
- Mausoleum of Mahdumi Azam
- Koh-e Navruz (Palace of Navroz)
- Statue of Ismaili Somoni & Rudaki Park
- Istiklol Complex: Observation Deck and Historical Museum

This morning we drive 23km west from Dushanbe to the ancient fortress of Hissor. The medieval *Arg* (citadel) gateway of this ancient Silk Road town still dominates the fertile plain. Below the *Arg*, stands the 16th-century Kuhna *madrasa* which today holds a small museum of ethnography. Next door stands a later 19th-century *madrasa* (Madrasa-i-Nau, *nau* meaning 'new') and the remains of a large caravanserai. This latter building is testament to the long mercantile history of Hissor, with a 5th-millennium Neolithic village excavated on a hill beyond the *Arg* and the remains of 23 separate towns and cities buried beneath the current remains. A town at Hissor is attested under Achaemenid, Hellenistic, Sogdian, and Islamic rule and was a key centre for the Emirate of Bukhara, entirely overshadowing Dushanbe in significance. Hissor was an important stopover on the east-west trade routes over the High Pamirs to China, and a redistribution centre for the collection of lapis lazuli, mined upstream in Badakhshan. Just next to the *Arg* gateway is a gnarled mulberry tree, festooned with ribbons and tokens left by pious pilgrims and visitors. Reputedly, this tree was bent when Ali, the cousin of the Prophet Mohammad, landed here on the back of his flying horse to defeat a local necromancer. Nearby is a holy well dedicated to the missionary who rushed word to Ali in the Hejaz of the wizard's evil works. Next to the tree and holy well stands a 16th-century mausoleum dedicated to the Sufi scholar Mahdumi Azam.

Dushanbe, which translates as 'Monday' in Tajik Persian, was the location for a quite insignificant town and small bazaar, held on the first day of the week, until the arrival of the Bolshevik Red Army in 1921. The 'Reds' were in pursuit of the last Emir of Bukhara, who had fled east in his Rolls Royce with his favourite dancing boys, whom he hurled off the back of his vehicle, one-by-one, as part of a successful effort to

evade capture following the fall of Bukhara in 1920. The Emir attempted to organise resistance to the Bolsheviks from Dushanbe before fleeing south and crossing the Oxus on rafts to the relative safety of Afghanistan in 1921. With the departure of the Emir, the Soviets chose the site of Dushanbe as the administrative capital of their new *Oblast* of Tajikistan. Modernisation quickly followed, with grand new buildings erected along Rudaki Avenue, the growing city electrified, new schools and clinics opened to all. In 1929 a train, driven by an Armenian, steamed into the new station, connecting Dushanbe with the Soviet economic powerhouse of Tashkent. In the same year, the Soviet Socialist Republic of Tajikistan was split off from the Soviet Socialist Republic of Uzbekistan, and Dushanbe was chosen as the capital of the new Republic. Dushanbe continued to benefit from the largesse of Moscow and since Tajikistan was so far from the centre of Soviet political and cultural life, many architects were commissioned by local authorities to build radical modernist structures without fear of censure or imprisonment.

During WWII Stalin moved vast quantities of men and materials to the Central Asian republics in an effort to keep them out of Hitler's reach and the Soviet war machine functioning. Dushanbe dramatically grew in size and was chosen as the location for a large POW camp for German soldiers and Volga German civilians deported by Stalin. Many apartment blocks were constructed by these German exiles and estate agent windows still proudly proclaim 'German-built' when advertising properties for sale. Dushanbe further expanded through the 50s, 60s and 70s with migrants attracted to the city from across the Soviet Union. This cosmopolitanism came to a bloody halt with independence and the outbreak of civil war in 1992. Within a year, Dushanbe and Tajikistan lost nearly a third of her population: mostly ethnic Russians, Tartars, Balts, Armenians, Azeris, and Jews who had made up much of the republic's technocratic, professional and administrative class. Despite the ending of the civil war, Dushanbe has not recovered her previously sophisticated character and the current president has pulled down much of the splendid 20th-century Neo-Classical architecture in the last couple of years, instead favouring glass and metal monstrosities best classified as 'Dubai-chic' or 'Dictator-tat'.

After lunch, and some time to rest during the heat of the day, we see an example of the 'new Dushanbe': the cultural palace of Koh-e Navruz, or 'Palace of the New Year'. Originally planned as a huge *chaikhana* (tea house), the project was high-jacked by the current President who instead insisted on a grand 'palace of the people', consisting of twelve huge chambers, decorated with the traditional Tajik crafts of woodcarving, painting and mosaic, all capable of holding 3200 guests. We also visit the gold statue of the great Samanid king, Ismoili Somoni, and Rudaki Park.

This evening we visit the new Istiklol Complex which opened in September 2022. The observation deck provides spectacular views of the city. There is also an interesting historical museum located on the second floor. (Overnight Dushanbe) BLD

Day 8: Sunday 30 May, Dushanbe

- Shah Mansur Bazaar
- Museum of National Antiquities & Lecture by Archaeologist Mr Saidmurod Bobomulloev
- National Museum of Tajikistan
- Gurminj Museum of Musical Instruments

This morning we explore the centre of the city including the bustling and colourful Shah Mansur Bazaar, and visit the famous Museum of National Antiquities which opened in 2001. This excellent institution holds artefacts from Tajikistan's Islamic and pre-Islamic past including Greek, Bactrian, Sogdian, Zoroastrian, Buddhist, and Hindu objects, from coins and armour to jewellery and sculpture. The centrepiece of the collection is undoubtedly the 14-metre-long reclining Buddha in Nirvana, a 6th-century AD ceramic statue from southern Tajikistan, discovered in 1966 at a hill known by locals as 'Ajina Teppe', (The Devil's Hill). The

Buddha was commissioned by a member of the Iranian-speaking Kushan dynasty, whose great capitals at Taxila in Pakistan, Kapisa (Begram) and Balkh in Afghanistan, were instrumental in propagating Buddhism across Asia and the traditions of Gandharan/Hellenic naturalism in art. The Kushans commissioned the famed monumental Bamiyan Buddhas. The Kushans' Bactrian heartland of southern Tajikistan and northern Afghanistan was littered with monasteries, stupas, nunneries and shrines, all patronised and commissioned by the Kushan elite.

While at the museum, we have the privilege of a special lecture by Tajik archaeologist Mr Saidmurod Bobomulloev who has excavated the extraordinary site of Takht-e Sangin, on the northern banks of the Oxus river. Takht-e Sangin was a Hellenistic shrine dedicated to the God of the Oxus and is almost certainly the original depository for the extraordinary 'Oxus Treasure' – taken from brigands in the mountains of 19th-century Afghanistan by a British officer of the Raj, and now one of the highlights of The British Museum.

In the afternoon we first visit the National Museum, which has several well-designed archaeology galleries which complement those at the Museum of National Antiquities. Here, there are more frescoes from Penjikent and small pieces of the Oxus Treasure from Takht-i Sangin, and also life-size replicas of parts of the the Ajina Tepe Monastery and the temple at Takht-i Sangin. There will then be time to go to the nearby Gurminj Museum of Musical Instruments. This museum was founded in 1990 by Tajik artist Gurminj Zavqibekov. The talented actor started gathering local and traditional instruments as a teenager and since 1990 has accepted donations from across Tajikistan. The museum currently holds more than 200 working stringed and percussion instruments including *setars*, *dutars*, *rubabs*, *tanburs* and *chang*. Here we enjoy a demonstration by local musicians.

Lunch and Dinner will be served at local restaurants. (Overnight Dushanbe) BLD

Kalai-Khum, Tajikistan - 1 night

Day 9: Monday 31 May, Dushanbe – Nurek – Khulbek – Kalai-Khum (370km, 6 hrs)

- Norak Reservoir
- ShurabaPass (2277m)
- Ancient City of Khulbek & Museum

Today we leave Dushanbe and drive east to the town of Kalai-Khum. En route we visit the site of the last gasp of Soviet engineering in Tajikistan: the vast Norak Dam and water reservoir designed to power much of Soviet Central Asia. With the outbreak of civil war and flight of most ethnic Russians and other Soviet nationals, the dam systems quickly fell into disrepair and the old Soviet pan-Central Asian power network entirely broke down. The current President of Tajikistan has committed to building a new, larger dam on one of the other tributaries of the Oxus, with Russian and Chinese engineering and financial assistance. This new dam would effectively allow Dushanbe to control the downstream flow of water to Uzbekistan and Turkmenistan – much as Turkey now controls the flow of the Euphrates and Tigris to Syria and Iraq. The former President of Uzbekistan, Islam Karimov, threatened that Uzbek tanks would be in Dushanbe within 24 hours of the start of construction of any new dam; tangible evidence of the importance of irrigation for life in Transoxiana. With the death of Karimov, the former Prime Minister and new President of Uzbekistan has attempted to normalise relationships with Tajikistan, including lifting some restrictions on Uzbeks and Tajiks crossing borders for family visits and reopening direct flights between Tashkent and Dushanbe for the first time in 23 years. The new president is keen to ensure access to cheap power for populous and energy-short Uzbekistan and it seems unlikely he will follow through with Karimov's threat of invasion.

The highest point of our day's journey takes us over the Shuraba Pass at 2267m and on our descent we

follow the spectacular road running alongside the Panj River, with Afghanistan looming on the other bank.

En route to Kalai-Khum we stop at the small modern town of Vose to visit the ruins of the medieval Islamic city of Khulbek (Hulbek). This urban centre flourished with the growth of Silk Road trade encouraged by the Samanid dynasty between the 9th and 10th centuries, but was ravaged by a Karakhanid army in the mid 11th century and never recovered. The local museum holds artefacts from the Arg; it was excavated by the Soviets who partly reconstructed the citadel walls and gateway. We will have the privilege of a special tour by the founder and director of the museum, Mr Abdullo Khodjaev, who has excavated Khulbek since the late 1980s.

Dinner at a local *chaikhana* in Kalai-Khum. (Overnight Kalai-Khum at 1350m) BLD

Khorog, Tajikistan - 2 nights

Day 10: Tuesday 1 June, Kalai-Khum – Parshinev – Khorog (250km, 50% asphalt, 50% dirt road)

- Castle Karon (1700m)
- Pir-I Shoh Nosir and Holy Spring dedicated to Nosily Khusrav, Parshinev

First thing today we will visit Castle Karon, a recently discovered archaeological site on the edge of Kalai-Khum which has been described as “the Machu Picchu of Tajikistan”. Occupying a dramatic location high above the river, this was the site of an extensive citadel, polo stadium, and Zoroastrian fire and water temples, as well as mines and a customs building. Archaeologists are still excavating and learning more about the city each season, but the latest evidence suggests Karon was founded in the 2nd millennium BC and occupied until about 500 years ago. We will start our visit early, before the day becomes hot, as it is a steep climb to the top of the site and it is not accessible by vehicle.

We now drive on to Khorog in the High Pamirs where we stay for two nights. Our road follows the dramatic gorge of the Panj River, overlooking Afghan villages clinging to steep mountainsides on the opposite bank. We drive through the spectacular scenery of the Vanch region, gateway to the majestic Fedchenko Glacier. While in the Rushan Valley we may view (from a distance) the Vamar Fortress.

After the village of Rushan (also spelled ‘Rushon’), the road begins to climb and we pass into the predominately Ismaili Pamirs. As in the Caucasus, this dramatic landscape of deep valleys and gorges separating stark mountain peaks, encouraged an extraordinary linguistic and cultural diversity. Pamiri Tajiks speak their own language, related to Persian, Tajik and Dari, further subdivided into 20 plus dialects, some of which are nearly mutually unintelligible. The Pamiris of Rushan speak Rushani, a dialect of Western Pamiri, one of twelve local languages spoken by the inhabitants of valleys separated by only a couple of kilometres.

Ten kilometres from the town of Khorog we stop at the Pamiri village of Parshinev whose inhabitants also speak their own dialect. Here we visit the Pir-I Shoh Nosir, a shrine dedicated to a Sufi master, and a holy spring dedicated to Nosiry Khusrav (1001 AD), a missionary who converted the local population to the Ismaili sect of Islam.

On arrival at Khorog we transfer to our hotel. (Overnight Khorog at 2020m) BLD

Day 11: Wednesday 2 June, Khorog

- Pamir Botanical Garden (2320m)

- Khorog Museum
- Introduction to Khorog's new Ismaili Jamatkhana and Cultural Centre

We begin today with breakfast in the capital of Gorno Badakhshan Autonomous Oblast (GBAO). This small town of 24,000 souls was an insignificant place until the Tsarist Russians established a military base here in 1896. The town became the military and administrative capital of one of the most far-flung imperial Russian provinces, frontline of the 19th- and 20th-century 'Great Game' between agents of St Petersburg and the British Empire. Khorog quickly expanded on imperial Russian largesse, blessed with the second highest Botanical Gardens in the world to the delight of the local Tsarist demi-monde. The Bolsheviks arrived in 1921, quickly building a school, hospital, and in 1932, an airport. The same year, the first plane to fly the treacherous route into the High Pamirs landed at Khorog, piloted by an aviatrix from Bukhara, who had burned her *paranja* (horse-hair veil) in Bukhara's Registan twelve years before. A metalled road for Soviet military and scientific vehicles was hacked through the mountains in 1935 (optimistically named the Pamir Highway) connecting Khorog with Osh and Dushanbe.

GBAO was a curiously blessed province under the Soviets, as it had been under Tsarist rule. Because it was close to international borders with China, Afghanistan, Pakistan, India and, before Indian independence, the British Empire. Moscow filled the High Pamirs with military bases and watching stations, scientific expeditions, and all the outposts of a paranoid, authoritarian empire. Daily flights connected privileged Soviet citizens of Khorog directly with Dushanbe and from the Tajik capital, on to Moscow, Leningrad and Tashkent. Aeroflot pilots were paid a substantial danger-bonus for their work and this also applied to many of the technicians and specialists living in this remote town and its surrounding districts. This imperial bounty dramatically ended with the reluctant declaration of independence by Tajikistan in 1991 and almost immediate outbreak of civil war. Suddenly stateless Soviet administrators decamped en masse to Russia, while the indigenous Pamiris found themselves very much alone and in serious trouble. Cut-off by the civil war raging in the Tajik lowlands, starvation for the local population was a serious possibility throughout 1993/4. Virtually all food – except meat on the hoof – had been imported to Khorog by the Soviet supply-chain.

Virtually all Pamiris are Ismaili Muslims and with political independence in 1991 came religious freedom. The leader of the Ismaili community, the Aga Khan, organised airlifts of food, medical supplies, and specialist personnel throughout the 1990s – almost certainly saving the lives of the local people. With the end of the civil war, Khorog and the Pamiris achieved a certain wary autonomy from Dushanbe, subsidised by the wealth of the Aga Khan. Most of the local educational facilities, including the extraordinary University of Central Asia, healthcare and social facilities of Khorog and nearby valleys are paid for by the Aga Khan Foundation.

Khorog is today once again a frontier town, with vast quantities of Afghan heroin smuggled over the border upstream of the Panj River for on-shipment to Russia and Europe. Unsurprisingly, this *tsunami* of opiates has also drowned this desperately poor region in corruption; the Tajik military commander in charge of drug indictment in all GBAO engaged in a shoot-out in the town centre in 2015 with military colleagues and special forces sent from Dushanbe over claims and counter-claims of who was protecting rather than arresting the smugglers.

This morning we drive east of Khorog, along the 'Pamir Highway, through the lovely Ghunt river valley where small villages cluster along a beautiful, turquoise-blue river. Just outside of Khorog, on a high terrace between the Gunt and Shahdara rivers, lies the Pamir Botanical Garden, which we visit. Planted at an altitude of 2320m (the second highest in the world), garden staff carry out research on Badakhshan endemic fruit, ornamental plants and vegetables, and experiment with acclimatizing foreign plants. In 1934 the first seed potatoes were planted. Today they are grown in abundance, even at altitudes above 300 metres.

Later we return to Khorog for a visit to the ethnographic museum, containing a piano carried all the way across the Pamirs by 20 bearers from Osh, for the edification of a Tsarist military officer's daughter.

The Ismaili Jamatkhana and Culture Centre of Khorog opened its doors in December 2018 as a prayer and educational space for the Ismaili community. Due to government restrictions, it is not currently open to the public, but we will hear firsthand from one of the former guides about this beautiful, symbolically complex piece of architecture and the nature of the Ismaili faith. Pamiri Isma'ilism is unique in a number of ways. The region's geographical isolation made it difficult for initial Muslim missionaries to break ground, and so compromises were made allowing older religious practices to be incorporated into contemporary worship. Mosques are almost non-existent in the region, with Khorog's Jamatkhana the first official place of public worship. Many traditions are instead centred around the Pamir House, a traditional residential building that draws on ancient fire-worship as much as contemporary Islam. (Overnight Khorog at 2020m) BLD

Zong, Tajikistan - 2 nights

Day 12: Thursday 3 June, Khorog – Ishkashim – Wakhan Valley – Zong (190km, 4-5hrs)

- Kakhkah (Khaakha) Fortress & Shrine of the King of Men (Oston-i-Shoh-i Mardon), Namadgut
- Shoh Isomuddin Shrine and Sacred Trees, Ptup

We depart Khorog, driving south along the Panj River. On the Afghan bank of the river, we see a pass leading deep into Badakhshan. This was the path likely taken by Marco Polo on his hunt for famous local ruby mines. These so-called Lali Badakhshan Rubies are in fact spinels, but still considered precious enough to have been incorporated into Queen Elizabeth II's Coronation Crown; they were widely treasured across Eurasia prior to the 20th century.

We enjoy a simple lunch in the mixed Wakhi and Pamiri village of Ishkashim, which prior to the pandemic, was the location of an official Tajik border crossing into Afghanistan (along with the Friendship Bridge crossing at Khorog).

The Panj River takes a sharp turn eastward at Ishkashim and we follow the flow upstream to the village of Namadgut. Here the valley is known as the Wakhan and both valley and village are dominated by a Kushan fortress known to locals as the 'citadel of Kakhkaha'. Kakhkaha is believed by Pamiris to have been the chieftain of the *Siah-Posh* or 'Black Robes'; a tribe of fire worshippers, driven by Ali from the Wakhan to exile in Nuristan in Afghanistan. In reality, this was a fortress dating back to the 2nd century BC, constructed to guard the lapis and spinal ruby trade east to China, west to Bactria, and north to Fergana. The legend of the fire worshipping Kakhkaha is almost certainly a folk memory of Zoroastrian and Kushan practice and the arrival of Islam.

Nearby is the Ismaili *mazor*, or shrine, of Oston-i Shoh-i Mardon dedicated to Ali at the site of his reputed victory over the fire-worshipping Kakhkaha. The wooden *mazor* door is decorated with lovely carving and dates to the 11th century. The shrine is also decorated with ram's horns, typical of shrines in the area. Following the Panj up the Wakhan Valley we continue to the village of Ptup with a lovely *mazor* and garden of sacred trees.

On arrival at the village of Zong we transfer to our homestay which is a traditional Pamiri house. These structures are filled with symbolic and ritual space, as Ismailis in the Pamirs do not build mosques, instead worshipping at home. Pamiri Ismaili Islam is further overlaid on a deep Iranian history stretching back over four millennia. Three separate living spaces represent the three kingdoms of nature, while five carved wooden pillars simultaneously correspond to the family of Ali (cousin and brother-in-law of the prophet

Mohammad) and five Zoroastrian immortals, including Anahita and Mehr. Each pillar also represents a different age of human existence, from childhood to marriage, and death. Carved roof beams represent the number of Ismaili Imams; the number of Shia Muslims killed at the battle of Karbela; all the prophets of Islam, from Abraham to Jesus; and the seven Zoroastrian heavenly bodies. A wooden skylight called a 'chorkhona' or 'four houses' in Pamiri Tajik, is divided into four quarters representing the four elements. Some of the exterior and interior of each house is painted. The colours white and red have deep meaning in Pamiri culture: red represents life and the sun (the first thing created by God), while white represents light and milk (the font of human sustenance for this predominately pastoral culture). (Dinner and overnight: Homestay in Zong 2950m) BLD

Day 13: Friday 4 June, Zong – Yamchun – Yamg – Vrang – Zong

- Yamchun Fort (Zulkhomor Fort)
- Oston-e Bibi Fotima-Zahro (Bibi Fatima Springs), Yamchun
- House Museum & Solar Stone of Sufi Muboraki Vakhoni, Yamg
- Vrang Buddhist Stupa & Ruined Fortress
- Mazor-I Shoh Kambar-I Oftob (Shrine of Lord Kambar of the Sun), Zong

This morning we drive back to Yamchun village to explore the imposing Zamr-e Atish Parast or the 'Fortress of the Fire Dwellers'. Elements of this fortress date back to the Graeco-Bactrian kingdom of the 3rd century BC, as well as Gandharan Kushan construction from the 2nd to the 1st century BC. Most of the standing remains date from the late 1st millennium AD and the arrival of Islam. However, on a rock-plug, off the eastern lower flank of the main fortress, stands a smaller isolated fort known locally as *Zulkhomor*. This fort dates to Sogdian control of the region in the 7th to 8th century AD. Zulkhomor is believed by locals to have been the younger sister of Kakhkaha, who built this great house for her pleasure.

Nearby is a hot mineral spring known as Oston-e Bibi Fotima-Zahro, or 'the Holy site of the sleeves of Bibi Fatima', regarded for its supposed power over female fertility and reputedly popular with Zulkhomor herself. After a relaxing dip we enjoy one of the finest views in all the Pamirs.

Following lunch in a traditional Pamiri house, we visit the reconstructed house museum of Sufi master Muboraki Vakhoni (1839-1930). Here, we may view the stone that he used as a solar calendar to determine the date and time of the *Navruz* festival. Our host for lunch, Aydar Malikmamadov, is the great-grandson of the Sufi and will explain how his ancestor devised his instrument. Aydar Malikmamadov will also show us the process by which he makes the traditional musical instrument *rubab*, of which he is both master craftsman and musician. The local museum is a gorgeous traditional Pamiri house with especially fine carved woodwork.

Next, we drive east up the Wakhan valley to the village of Vrang. On a hill behind the village stands a Kushan Buddhist stupa of the 5th to 6th centuries AD, surrounded by 60 caves used by pilgrims and monks. The top of the stupa holds a stone carved footprint of the Buddha. Below the stupa stands a *mazor* dedicated to a famous Sufi poet and mystic of the 11th century, Abdullah Ansari of Herat (western Afghanistan). Looming above the village, stupa, and shrine alike, are the remnants of a probable Kushan fortress of the early 1st millennium BC.

Driving further along the valley we return to the village of Zong which is dominated by the remains of the Graeco-Bactrian/Gandharan/Kushan fortress. Zong also has six different *mazors*, including one dedicated to the prevention of plague, especially credited with preventing an epidemic of cholera. Another, the Mazor-I Shoh Kambar-I Oftob, which we shall visit, is dedicated to the 'Master of the Sun', has been used since pre-Islamic times. (Overnight Homestay in Zong 2950m) BLD

Murghab, Tajikistan - 1 night

Day 14: Saturday 5 June, Zong – Langar – Alichur Valley – Murghab (255km, 6-7hrs)

- Khargush Pass (4344m) & Nezatash Pass (4476m)
- The Pamir Highway
- Holy Pool at Ak Balik
- NGO Women's Cooperative, Murghab

Today we turn northeast, driving past the Kushan fortress at Ratm and following the Panj river valley. We cross into the high, arid semi-desert region of Murghab via the high Khargush Pass (4,344m) and Nezatash Pass (4,476) and the village of Alichur at 3863m (whose name translates appropriately as 'Ali's curse'). The stretch of road from Langar to the Pamir Plateau via the Khargush Pass is particularly scenic. If we are lucky, we may see marmots, golden eagles, vultures or ibex.

We join the Pamir Highway and our drive takes us through a landscape of bleak bogs and moors – and a reputedly holy pool at Ak Balik (meaning 'white fish'). The road carries on climbing over desolate barren ground, crossing another mountain pass at Nayzatosh (3137m) before descending to the predominately Kyrgyz town-at-the-end-of-the-world: Murghab. On arrival we visit the NGO women's cooperative selling predominantly Kyrgyz *shyrdak* (felt products). (Overnight Murghab at 3630m) BLD

Osh, Kyrgyzstan - 2 nights

Day 15: Sunday 6 June, Murghab – Kizil Art Pass – Sary Tash (230km) – Osh (185km)

- Akbaital Pass (4655m) & Uybulok Pass (4232m)
- Lake Karakul (3914m)
- Tajik/Kyrgyz Border at Kyzyl Art Pass (4336m)

Murghab is the administrative and economic centre for the Tajik knot of the High Pamirs, with nomad tracks leading from the town over the high mountain passes into Pakistan, Afghanistan, and China. We depart Murghab early this morning and drive along the fenced border with China via the Akbaital Pass (4655m), Uybulok Pass (4232m) to the Tajik/Kyrgyz border crossing at Kyzyl Art Pass (4336m). The landscape en route is an extraordinarily blasted mountain desert, punctuated by the vivid lapis blue of Lake Karakul (3914m). On clear days we can see Mt Somoni (or 'Pik Lenin' to most former Soviet citizens) the highest peak in the Pamirs, at 7134 metres.

Completing border formalities with the Tajiks we drive over the top of Kizil Art Pass and descend to the Kyrgyz border crossing. Completing our Kyrgyz paperwork, we proceed down the pass on a new Chinese-built road through the beautiful Pamir Mountains via the Kyrgyz town of Sary-Tash and on to the Fergana city of Osh. (Overnight Osh at 963m) BLD

Day 16: Monday 7 June, Osh

- Osh's Jayma Bazaar
- Takht-i-Suleiman (Solomon's Throne)
- Time at leisure

Osh is Kyrgyzstan's oldest, and second-largest, city with a mostly Uzbek population of around 250,000. A lively commercial city that links Central Asia with China, Osh has one of the largest bazaars in Central Asia, which we visit in the morning, relaxing after our high-altitude adventure, tasting delicious local fruit and

enjoying the smell of spices.

We then drive to Sulaiman-Too or 'Throne of Solomon', located on a rocky outcrop in the city centre. Here we visit the local museum and, following in the footsteps of many pilgrims, ascend the hill where Zahiruddin Muhammad Babur (founder of the great Mughal Dynasty) built a shelter for his spiritual retreat in the 15th century. 'Babur's House' is an important pilgrimage site and many Muslims from across Fergana come here to pray, or have prayers said for them by the resident Imam. Following our visit, the remainder of the day is at leisure. (Overnight Osh) BLD

Lake Toktogul, Kyrgyzstan - 1 night

Day 17: Tuesday 8 June, Osh – Uzgen – Lake Toktogul (360 km)

- Karakhanid Monuments of Uzgen: 11th-Century Brick Minaret & 12th-Century Mausoleum Complex
- Gorges of the Central Tien Shan Mountains

This morning we travel 55km northeast to the town of Uzgen (Özgön), located on a cliff-top above the Kara-Darya River at the eastern end of the Ferghana Valley. Uzgen, mentioned by Chinese chroniclers of the 2nd century BC, later became an important Sogdian Silk Road city with a vibrant economy and its own mint. Uzgen was chosen as one of the capitals of the Turkic-speaking Karakhanid dynasty who overthrew the Samanids and ruled a large – if shaky – Central Asian empire from Uzgen, Bukhara, Balasangun (outside modern Bishkek) and Kashgar for much of the 10th to 12th centuries. The Mongols finished off the eastern branch of the Karakhanids in the 13th century, while the western Karakhandids were overthrown and subjugated by the Ghurids of Afghanistan and Khwarezmshahs of Khorezm in the 12th century. Uzgen was a ceremonial capital for the Karakhanids. We will visit the lovely 11th-century brick minaret (a close cousin of the great minaret in Bukhara) and three well-preserved 12th-century mausoleums, constructed from beautiful decorated brick, including the tomb of the greatest ruler of the Karakhanid dynasty, Ahmed ibn Ali.

From Uzgen we continue our journey north to Lake Toktogul via the stunning gorges of the central Tien Shan Mountains. Tonight we stay in the small, recently renovated Hotel Kok-Bel, located near the lake. (Overnight Lake Toktogul) BLD

Bishkek, Kyrgyzstan - 2 nights

Day 18: Wednesday 9 June, Toktogul – Suusamyr Valley – Bishkek (360km)

- Chychkan Gorge & Suusamyr Valley

This morning we depart for Bishkek, capital of Kyrgyzstan. Our journey takes us via the beautiful Chychkan Gorge and Suusamyr Valley, a huge prairie where local transhumants come in summer to herd their cattle. Our journey takes us through some of Kyrgyzstan's most dramatic mountain scenery, across passes of over 3000 metres (Teo Ashhu pass approx. 3586m) and peaks over 4000 metres.

The first textual references relating to peoples living in the territory of modern Kyrgyzstan are in the sacred book of Zoroastrians, the *Avesta*, and Herodotus' splendidly profane *Histories*. In Achaemenid Persian administrative sources, local tribes were known as *Saka*, while contemporary Greeks called them 'Asian Scythians'. These *Saka*, or Scythians, are best known from their *kurgan* burial mounds, often containing spectacular metalwork, and a few inscriptions carved into the rocks of the Tien Shan. Most Scythians were pastoralist nomads, united in tribal associations, and ultimately subsumed by other nomad confederations during the 3rd to 2nd centuries BC. A number of Scythian *kurgans* line our journey north to the capital

Bishkek.

En route we shall probably see Kyrgyz shepherds and their yurts: the ubiquitous felt tents of nomads across much of Eurasia. Kyrgyzstan is a small, mountainous country, at the western tip of the Tian Shan mountain range and the most picturesque and least urbanized of all the Central Asian Republics. With the collapse of the Soviet economic system and consequent devastation of Kyrgyz industry, many people reverted to a more traditional life rearing sheep, cattle, pigs and goats in garden-villages and, at altitudes too high for these, herding yak. In the fertile green valleys, fruit, vegetables, cereal crops and cotton are grown in semi-collective farms. (Overnight Bishkek) BLD

Day 19: Thursday 10 June, Bishkek

- Ala-Archa Canyon
- National History Museum, Bishkek
- Farewell Dinner with opera singer and local musicians

This morning we make an excursion to the Ala-Archa Canyon, located in the highest, central part of the Kyrgyz Ridge. This is famous for its eternal snow – stretching for almost 200 km – and such peaks as Dvurogaya (4,380 m), Korona (4,860 m), Baylyanbaish (4,700 m), as well as the highest peak of the Kyrgyz ridge – Semenov-Tian-Shansky (4,875 m). The Ala-Archa Canyon is the centre of the Ala-Archa National Park, one of the main tourist attractions in Kyrgyzstan. The name of the national park, Ala-Archa, means “many-coloured juniper”, which testifies to the abundance of this tree here. A river with the same name crosses the canyon. This river, like all rivers in Kyrgyzstan, originates from mountain glaciers. The Ala-Archa, the Adygene and the Ak-Sai are the largest rivers in the national park. There are 160 species of birds in Ala-Archa. Local fauna also includes the snow leopard, a butterfly called the Night Peacock Eye, wolves, snakes, owls, and many other creatures. The Ala-Archa Canyon has about 1,100 species of plants: wormwood in the steppe zone at the mountain foot, different grasses, bushes and juniper forests on mountain slopes that are replaced with alpine meadows. We will take lunch here after enjoying a walk in the park and visiting a small museum (if open) which contains an excellent display of the range of animals and birds that live in the park.

After lunch we return to Bishkek where we spend the remainder of the afternoon touring this small Russian colonial city. Bishkek was only founded in 1825 and was called Frunze when Kyrgyzstan was part of the USSR. We visit the National History Museum which gives an excellent introduction to the history of this region’s nomadic cultures, from the Scythians to the modern Kyrgyz, and contains a memorable and even controversial section illustrating the Communist period.

This evening we shall dine at a local restaurant where we shall enjoy a performance of Kyrgyz folk music. (Overnight Bishkek) BLD

Day 20: Friday 11 June, Depart Bishkek

- Departure transfer for participants travelling on the ASA ‘designated’ flight

Participants travelling on the ASA ‘designated’ flight will transfer by private coach to Bishkek’s airport in the early morning. Please contact ASA if you require assistance with arranging an independent transfer. B

Accommodation

Accommodation ranges from 4-star hotels to very basic guest houses offering multi-share accommodation with shared bathroom facilities. The standard is very much based on availability in the areas where we will be travelling. Furthermore, some hotels/guest houses are extremely small, offering only 6-12 rooms. Single rooms will therefore not be possible in Zong (Langar). Lifts are NOT available in Kalai Kum, Khorog, Murgab or Toktogul. Further information on hotels will be provided in the 'Tour Hotel List' given to tour members prior to their departure.

- Tashkent (1 night): 4-star [Lotte City Tashkent Palace Hotel](#) – modern hotel with an excellent location next to the Alisher Navoi Opera and Ballet House.
- Khojand (1 night): 4-star [Parliament Palace Hotel](#) – a new hotel located in the city centre, offering air-conditioned rooms equipped with en suite bathroom, flat-screen TV and free WiFi.
- Penjikent (3 nights): 3-star Hotel Rudaki – a 3-star hotel located on the edge of town offering 29 spacious rooms equipped with air-conditioning, TV, free WiFi and en suite bathroom. See [image](#)
- Dushanbe (3 nights): 4-star [Atlas Hotel](#) – located in the city centre, this new modern hotel offers air-conditioned rooms with en suite bathroom, satellite TV, minibar and free WiFi.
- Kalai-Kum (1 night): 3-star [Hotel Karon Palace](#) – a modern hotel offering air-conditioned rooms equipped with en suite bathroom, satellite TV, minibar & WiFi.
- Khorog (2 nights): 2-star Hotel Lal – located in the centre of Khorog, offering 13 rooms with en suite bathroom.
- Zong, Langar (2 nights): Local homestay – traditional Pamiri House offering multi-share accommodation in either twin or triple rooms (with beds), or mattresses provided in a large room suitable for 5 people. Further details will be available shortly.
- Murgab (1 night): Hotel Pamir – a very basic guesthouse, offering rooms on first floor with own bathroom (with hot water heated by generator); other rooms offer shared bathroom facilities. Refer to the Gallery for images, see also [image](#).
- Osh (2 nights): 4-star [Hotel Classic](#) – located in the city centre, offering air-conditioned rooms with en suite bathroom, minibar and flat-screen TV.
- Kok-Bel, Lake Toktogul (1 night): [Hotel Kokbel](#) – a very basic hotel, offering air-conditioned twin rooms (a double room is 2 beds pushed together) with en suite bathroom and TV.
- Bishkek (2 nights): 4-star [The Plaza](#) – a modern hotel located in the city centre, offering 65 air-conditioned rooms equipped with en suite bathroom (inc. hairdryer), minibar, flat-screen TV, tea/coffee making facilities and free WiFi.

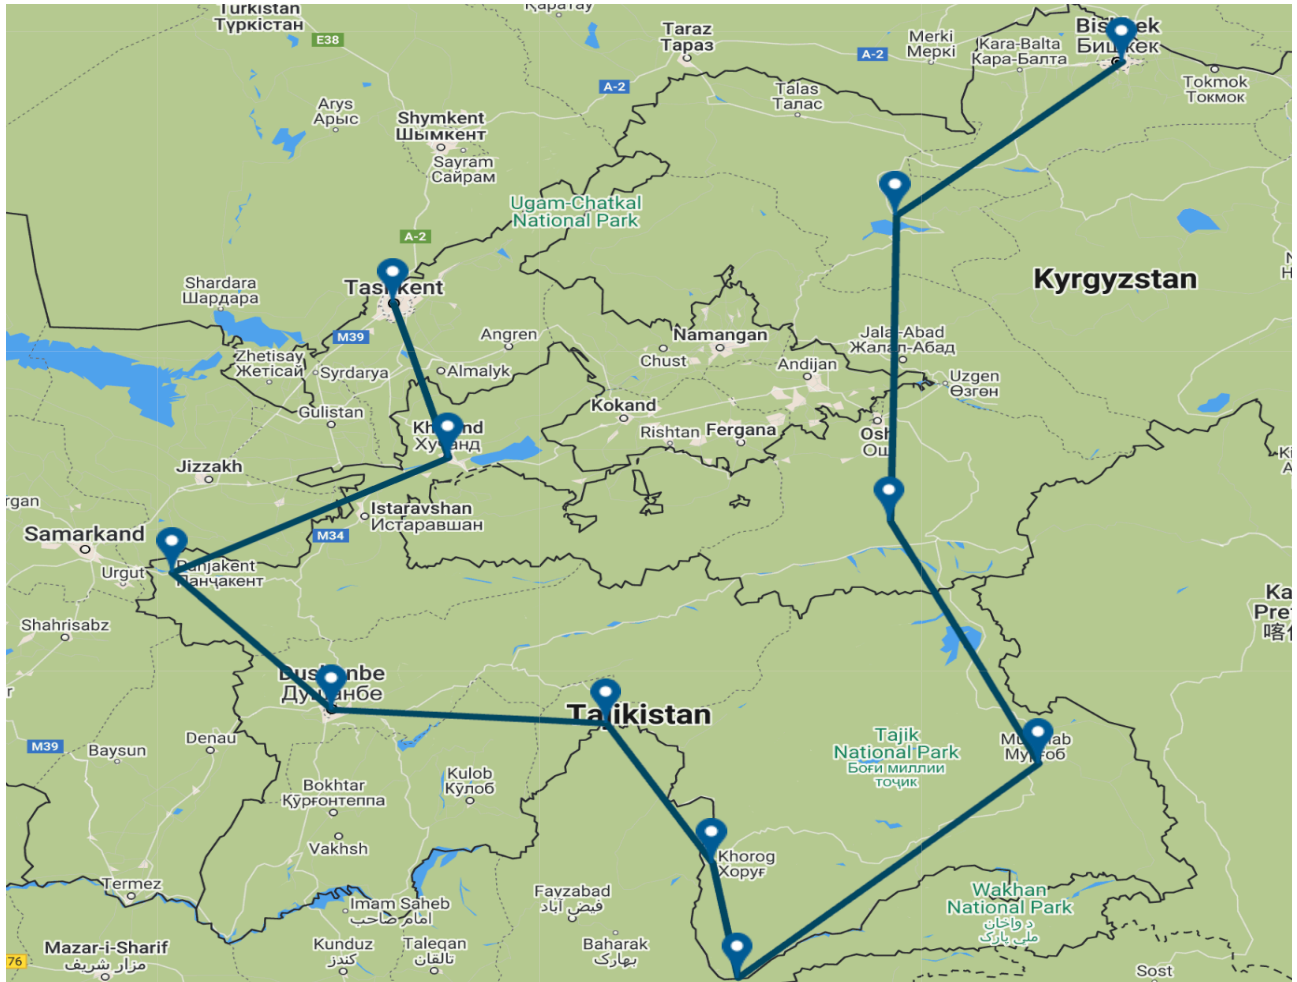

Note: Hotels are subject to change. In this instance a hotel of similar standard will be provided.

Single Supplement

Payment of the single supplement will ensure accommodation in a single room throughout the tour except in Zong where accommodation is extremely limited.

- Beverages with meals
- Personal spending money
- Airport-hotel transfers if not travelling on the ASA 'designated' flights
- Luggage in excess of 20kg (44lbs)
- Travel insurance
- Visa for Uzbekistan, Tajikistan & Kyrgyzstan

Fitness Criteria & Practical Information

Fitness Level

Level 3 - Challenging

Among our most physically demanding

This 20-day tour of Tajikistan and Kyrgyzstan is an epic journey that includes the Pamir Highway (M41) - the second highest road on earth. In 2027 this will be ASA's most challenging tour.

You must be able to:

- withstand exposure to high altitudes (defined as over 8000 feet or 2400 metres above sea level) and varying climatic conditions. This tour includes 4 days (3 nights) at high altitude as indicated in the tour itinerary.
- manage at least five to seven hours of physical activity per day with ease.
- Walk at a regular pace, some days for at least 5-7km, and negotiate challenging historic and archaeological sites many of which are large and unsheltered and include several flights of steps. Eg. access to the spectacular [Castle Karon](#) which is at 1700m, involves a steep uphill walk over rocky terrain which takes 30-40 minutes.
- cope with a demanding tour schedule which includes some longer days, several early-morning starts and several one-night stays.
- cope with extensive travel (the majority of which is by 4WD) on mountainous winding roads. Duration of travel ranges from 2-12hrs per day using:
 - Uzbekistan: Tashkent to Oibek border: air-conditioned coach
 - Tajikistan: Oibek border to Dushanbe, and from Dushanbe to Kyzl-art Pass: 4x4 Toyota Landcruisers or Toyota Landcruiser Prado, air-conditioned coach in Dushanbe
 - Kyrgyzstan: Kyzl-art Pass to Bishkek: 4x4 Toyota Landcruisers or Toyota Landcruiser Prado; air-conditioned coach in Bishkek
- cope with accommodation ranging from 3-4-star hotels to very basic guesthouses offering multi-

share accommodation with shared bathroom facilities.

- handle a shower over a bath; walk-in showers are NOT available at the smaller hotels and guesthouses.
- manage your own luggage – porterage is not available for the majority of hotels & guesthouses.
- tolerate cuisine which may be significantly different from your usual diet, and where catering for special dietary requirements is extremely limited. The food offer in Tajikistan, particularly in the High Pamirs, is limited.
- manage your health. There is a high risk of gastric ailments (you should consult your doctor about medication before departure). Refer to the Travel Doctor's web site www.travellingwell.com.au. The section in the book regarding traveller's diarrhoea treatment is very good and aligns with the advice from the Centre for Disease Control.
- travel with realistic expectations. Tajikistan's tourism infrastructure is still developing. You may encounter:
 - rudimentary toilets during many road journeys.
 - absence of WiFi & irregular plumbing at hotels and guesthouses.
 - variable road conditions and unavoidable delays.
 - limited options for changing money. Cash machines are not widely available, and often don't work.

Fitness Levels

Please also view the fitness criteria required for our tours, graded from Level 1 to Level 3, at www.asatours.com.au/fitness-level/

All ASA tours are active programs suitable for people with a good level of mental and physical fitness and good mobility. They are not suitable for people who lack stamina, have difficulty walking at the group's pace or who have mobility issues. An unavoidable aspect of every tour is the need to manage walking, stair-climbing and standing for long periods of time.

It is a condition of travel that all participants agree to accept ASA's directions in relation to their suitability to participate in activities undertaken on the tour, and that ASA retains the sole discretion to direct a tour participant to refrain from a particular activity on part of the tour. Before enrolling on an ASA tour please read the fitness requirements carefully.

The Effects of Altitude

The effects of altitude should be taken very seriously, especially by those with heart or breathing problems. However, neither age nor general fitness have been shown to affect your susceptibility. To help prevent altitude sickness the best measure is to limit activity, eat light meals, drink lots of water and abstain from alcohol. Please consult your doctor regarding medications available for altitude sickness prevention and treatment.

Passport & Visa Requirements

All tour members should ensure that they have sent ASA a copy of the front page of their current passport no later than 3 months prior to departure.

- Please check that your passport will be valid for 6 months after your date of return to Australia. This is important because many countries will refuse entry to anyone whose passport is about to expire.
- Please make sure your passport has at least 2 empty pages.

Visa requirements:

- Uzbekistan Nationals of Australia, New Zealand and the United Kingdom do not require a visa for thirty days.
- Tajikistan Nationals of Australia, New Zealand and the United Kingdom will need to purchase an [Electronic visa](#).
- Kyrgyzstan Nationals of Australia, New Zealand and the United Kingdom do not require a visa for sixty days.

Booking Conditions

Making a Tentative Reservation before the tour price has been published

ASA INTENTION TO TRAVEL APPLICATION FORM

Some ASA tours fill almost immediately. Don't miss out! You can register your 'Intention to Travel' by completing this application and returning this to ASA with a AUD \$200.00 per person deposit. Once the tour price has been published, the itinerary and ASA Reservation Application Form will be sent to you. From the time you receive the itinerary you will have two weeks to either:

- Send us a completed ASA Reservation Application Form together with an additional deposit of AUD \$800.00 per person. On receipt of this Reservation Application and deposit, ASA will process your booking and if approved, send you a tour confirmation. At this time your deposit of AUD \$1000.00 is subject to the tour's Booking Conditions.

Or

- CANCEL your Intention to Travel in writing. ASA will refund your AUD \$200.00 per person deposit, less a \$66.00 service fee (including GST).

Participation Criteria

To participate in an ASA tour, you must be reasonably fit, in good health and able to participate in all activities without assistance from Tour Leaders or other tour members. If you require assistance, a fit and able travel companion must undertake to accompany and assist you with all tasks for the duration of the whole tour. ASA's ability to make reasonable adjustments to accommodate your specific needs, your health and safety and the health and safety of other tour members, is of paramount importance to us. For this reason the ASA Reservation Application includes a Medical Information section. As a general guideline, you must be able to accomplish each of these activities without assistance or support:

- walk and stand unassisted for at least 2-3 hours a day in hot, humid conditions
- walk confidently on and over uneven surfaces
- climb at least 3 flights of stairs
- embark and disembark from ferries, buses and trains
- walk up and down steep slopes
- walk at a steady pace and no less than 1km every 15-20 minutes
- organise, manage and carry your own luggage
- follow and remember tour instructions and meet punctually at designated times and places
- administer your own medication.

Covid-19 Vaccination Certificate

Commencing from November 2021 it will be a condition of travel that all group leaders and ASA travellers are fully vaccinated against Covid-19. All participants must send ASA a copy of their vaccination certificate at the time of submitting their Reservation Application Form. For information on how to obtain either a Covid-19 digital certificate or a certificate in PDF format please view the [Australian Government Services Australia "What types of proof there are"](#) web page.
